## 2-Day Workshop on Clean Development Mechanism (CDM) & Energy Efficiency

23-24 December 2008  
Institute of Environment Education and Research  
Bharathi Vidyapeeth, Dhankawadi, PUNE

**ORGANISED BY**

**SIRI EXERGY & CARBON ADVISORY SERVICES (P) LTD. HYDERABAD**

**IN ASSOCIATION WITH**

**ECOSYSTEMS, PUNE AND BHARATI VIDYAPEETH**

**DILIGENT TOUCH KNOWLEDGE CORPORATION**  
**[CORPORATE TRAINING & EVENTS]**

## INTRODUCTION

Climate change is a reality now, impacting both the developed and the developing countries. The countries should, therefore, take into account the adverse impacts of climate change across various sectors of their economies, and try to build in appropriate redressal measures so as to minimize the losses. Multilateral environment agreements provide opportunities to catalyse such measures. For example, the CDM (clean development mechanism) of the UNFCCC (United Nations Framework Convention on Climate Change) is already in place, and several countries and industries have gained out of this mechanism by implementing clean and environmentally sound development practices.

The CDM is a global mechanism under the Kyoto Protocol that enables project developers to receive carbon credits toward their green house gas (GHG) emission reduction Initiatives. India, being one of the Non-Annex I countries, the investors in this sector can additionally benefit from the CDM. The carbon market is growing in leaps and bounds. Indian industries are quite proactive in generating awareness amongst its customers and realising carbon credits, already more than 360 projects are registered from India and about 30 million CER's are already issued, this amounts to about Rs.3000 Cores. Present CDM market potential is around 30 Billion USD, and we need to tap this potential.

## OBJECTIVES

This training programme aims at

- A. Familiarising the participants the opportunities and issues in CDM and carbon trading.
- B. Equipping them with the skills to evaluate the CDM potential and realizing carbon credits in their respective organisations.

## PROGRAMME COVERAGE

- Understanding the climate change challenges and environmental issues
- Clean Development Mechanism (CDM ) & its back ground
- CDM opportunities in India in various sectors
- Energy Efficiency & Eligible projects under CDM
- CDM Modalities & Procedures
- CDM project Cycle
- Additionally & Baseline
- Validation & Verification issues
- Energy Efficiency & CDM project Implementation under ESCO route

- Carbon Trading
- Case Studies

## CERTIFICATION OF ATTENDANCE

On successful completion of the course, a certificate of participation will be awarded.

## TARGET GROUP

This programme is beneficial to all Senior / top level management officers from Industries, Power plants, Transco / Discoms, Agriculture Dept.'s. State & central Govt. Dept's related to Renewable energy, Energy Conservation, Municipalities & Urban bodies, Construction, FI's and Consultants

## PROGRAMME DETAILS

Time : 09.30 AM to 05.00 PM

Venue **Bharathi Vidyapeeth,  
Dhankawadi, Pune**

## PARTICIPATION FEE
