

AP CEMENT WORKS

ENERGY POLICY

We shall be committed to

Explore & maximize the use of latest & efficient technology to reduce energy consumption.

Reduce the consumption of coal, electricity & fuel oil through process optimization in order to reduce the Green House Gas emissions.

Utilise wastes such as fly ash & slag to conserve raw materials & use of alternate fuels to conserve fossil fuels.

Involve all the employees by motivating and training them on energy efficient practices throughout the plant and to improve productivity, cost effectiveness and working environment.

Spread the awareness among all employees and their families for conserving the energy.

C S REDDY
Vice President
