

18th April 2006

MESSAGE

I am glad to know that 2849 fresh candidates and 1446 supplementary candidates are appearing in the third National Certification Examination for Energy Managers and Energy Auditors under the Energy Conservation Act, 2001, conducted by Bureau of Energy Efficiency (BEE), Ministry of Power, Government of India, on 22nd and 23rd April 2006. On successful completion of examination, the candidate's role as either a Certified Energy manager or Certified Energy Auditor is of importance for the successful implementation of the Energy Conservation Act. In the years to come, there will be more and more challenges for the Energy Managers and Energy Auditors in meeting the increasing energy needs of the country by minimizing the gap between demand and supply. The best option is to conserve the energy and to utilize it in the most efficient manner so that the existing energy resources are made available for longer period of time and also in case of electrical energy, the existing capacity should be able to meet the demand of the larger population of users.

This examination not only aims at providing necessary knowledge to practicing energy engineers but also aims at capacity building for meeting the future needs of the energy sector. I am sure that all the energy professionals will be gaining a lot by appearing in this examination.

I wish the candidates all success in the ensuing examination and look forward to their valuable contribution to the energy sector.

(V.S. Verma)
