Phone No: 020-32304035
E-mail: energy@mitpune.com
psghate@mitpune.com**

Till 28/02/2008, indicating their present and expected emoluments.
Salary will not be a constraint for deserving candidates.

About us

EnerCon Solutions Pvt. Ltd. (Formerly Energy Management Centre of MIT Pune.) is a part of the 25-year-old highly reputed Maharashtra Institute of Technology (MIT) Pune group, which provides professional education in the field of Engineering & Technology.

EnerCon Solutions provides consultancy services in the areas of energy and utility system management, energy conservation and improving awareness about energy efficiency through appropriate training modules.

EnerCon Solutions has a team of experienced BEE (Bureau of energy efficiency) accredited Energy Auditors, electrical engineers, mechanical engineers and technicians.

We have so far conducted energy audits of different types of industries such as pharmaceutical units, hotels, hospitals, auto ancillary units, steel industries, commercial buildings etc.

Customers have immensely benefited by implementing our recommendations.

Along with energy audits we also offer services for proper implementation of Energy Conservation measures recommended by us through the energy audits (with technical know how & expertise available with us in this field).

During the energy audit exercise we impart training to the concerned plant personnel on the recommended practices & schemes to be implemented.

The Energy Audit has acquired a greater significance in the context of scarce energy resources and higher energy cost for most of the industries. Therefore Govt. of India has enacted Energy Conservation Act - 2001 to promote energy conservation and improve energy efficiency in energy intensive industries.
