

EnerCon Solutions Pvt. Ltd. Is a MEDA (Maharashtra Energy Development Agency) accredited premier company active in the field of conducting energy audits and consulting in energy systems. For its expanding operations all over India and overseas, it urgently requires following technical personnel to join its team:

- 1) **Field Engineer (Electrical)** : Candidate should possess a Diploma in Electrical Engineering with minimum 3 years experience in a medium scale industry in maintenance of electrical system such as transformers, switch gears, PCCs, MCCs, DG's etc.... He should be able to operate field testing instruments like power analyzers and interpret the data obtained.

Preference will be given to those who have passed BEE examination of Energy Manager.

- 2) **Engineers (Energy Audit)** : Degree in Electrical / Mechanical / Chemical engineering with preferably over 3 years of experience in operation / maintenance of plants / establishments involving systems like electrical systems, HVAC systems, boilers and steam systems, compressed air system, furnace, chemical process system, steam & gas turbines etc.. Those who have worked in energy monitoring / management activities and passed the BEE's examination of Energy Auditors will be preferred.

Interested candidates should send their applications with bio-data either by post or by e-mail to,

**Director,
EnerCon Solutions Pvt. Ltd.
519, Siddharth Tower,
Near Citypride Kothrud
Pune-411038**

E-mail: energy@mitpune.com

Till 31/10/2006, indicating their present and expected emoluments.

Salary will not be a constraint for deserving candidates.

About us

EnerCon Solutions Pvt. Ltd. (Formerly Energy Management Centre of MIT Pune.) is a part of the 25-year-old highly reputed Maharashtra Institute of Technology (MIT) Pune group, which provides professional education in the field of Engineering & Technology.

EnerCon Solutions provides consultancy services in the areas of energy and utility system management, energy conservation and improving awareness about energy efficiency through appropriate training modules.

EnerCon Solutions has a team of experienced BEE (Bureau of energy efficiency) accredited Energy Auditors, electrical engineers, mechanical engineers and technicians.

We have so far conducted energy audits of different types of industries such as pharmaceutical units, hotels, hospitals, auto ancillary units, steel industries, commercial buildings etc.

[Customers have immensely benefited by implementing our recommendations.](#)

Along with energy audits we also offer services for proper implementation of Energy Conservation measures recommended by us through the energy audits (with technical know how & expertise available with us in this field).

During the energy audit exercise we impart training to the concerned plant personnel on the recommended practices & schemes to be implemented.

The Energy Audit has acquired a greater significance in the context of scarce energy resources and higher energy cost for most of the industries. Therefore [Govt. of India has enacted Energy Conservation Act - 2001 to promote energy conservation and improve energy efficiency in energy intensive industries.](#)
