About us

EnerCon Solutions provides consultancy services in the areas of energy and utility system management, energy conservation and improving awareness about energy efficiency through appropriate training modules.

EnerCon Solutions has a team of experienced BEE (Bureau of energy efficiency) accredited Energy Auditors, electrical engineers, mechanical engineers and technicians. We have so far conducted energy audits of different types of industries such as pharmaceutical units, hotels, hospitals, auto ancillary units, steel industries, commercial buildings etc.

Customers have immensely benefited by implementing our recommendations.

Along with energy audits we also offer services for proper implementation of Energy Conservation measures recommended by us through the energy audits (with technical know how & expertise available with us in this field).

We also impart training to the concerned plant personnel on the recommended practices & schemes to be implemented for energy optimization.
